

The Sound of Music winners

The winners of the [Gippsland FM](#) "Sound of Music giveaway" joined Ann Patterson, Ann Pulbrook and Ashley Wincer on Sunday May 15th 2016 at the Regent theatre in Melbourne.

It was an excellent stage play and everyone enjoyed the show. We were all in awe of the Regent theatre architecture. It is such a beautiful building inside the theatre, it is something you have to see and experience to believe.

The last time Ann Pulbrook was at the Regent theatre, was back in 2000 for the filming of the TV mini-series *Blonde*.

If you have not seen a live theatre play before, it is highly recommended. It is not just about turning up just before the show starts, watching a play and leaving. It is all about the experience of watching actors play out their roles in front of you. It is an experience so different from going to the cinema. The sets were amazing, with quick transitions from one scene to the next in seconds. The special effects of rain and thunder were very effective.

It's an interesting story about the changes and circumstances the Von Trapp family experiences as a result of the introduction of Maria Rainer. Both the Von Trapps and Maria are forced to face up to their fears due to circumstances they find themselves in.

Starring Amy Lehpamer, Cameron Daddo, Marina Prior, Jacqueline Dark & Lorraine Bayly.

The acting and singing was brilliant, it was very entertaining and certainly worth going to see if you have the time.

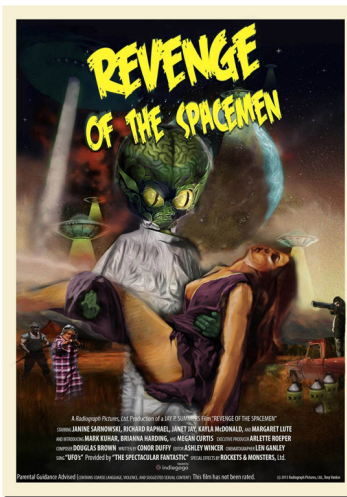

The Sound of Music is playing at the Regent theatre in Melbourne until Sunday July 31st 2016. For more information about The Sound of Music visit the official website at [soundofmusictour.com.au](#).

Contact us at The Sound of Movies

We can be reached through our website contact page [www.soundofmovies.com.au](#), Facebook, or Twitter. We are interested in hearing peoples soundtrack requests. We cannot promise we will be able to get hold of a specific soundtrack, but we will try.

The Sound of Movies would like to thank our sponsors [Morwell Neighbourhood House](#) & [Cinematic Randomness](#).
